Online short courses

The following 12-week online courses are now available:

- Advanced Human Genetics
- Analysis of Nucleic Acids
- Antibiotics
- Blood Transfusion
- Chromatography-Mass Spectrometry Analysis in Healthcare Settings
- Clinical Data Interpretation
- Diabetes and the Clinical Laboratory
- Diagnosis of Breast Cancer
- Diagnostic Haemostasis and Thrombosis
- Governance and Risk Management
- Immunocytochemistry in Diagnostic Cellular Pathology
- Implementing Advanced Quality Management
- Lung Disease
- Management of Healthcare Associated Infection
- Managing Learning and Development in Healthcare
- Point of Care Testing
- Quality Systems Management
- Renal Disease
- Robotics and Automation.

Who for

- Biomedical scientists
- Clinical scientists
- Laboratory, hospital and health service managers
- Healthcare professionals, including nurses, pharmacists and medical technical officers
- Quality managers
- Health and safety managers
- Risk and governance managers.

Course content

Each course comprises two components:

(a) Two face-to-face workshops held at Greenwich Campus
- Workshop 1: an introduction to e-learning, your tutor and your course
- Workshop 2: course consolidation.

(b) Guided online study.

We offer

- A high level of student support (tutor:student ratio of 1:10)
- Courses approved for CPD by the Institute of Biomedical Science, the leading body for those working in the field
- University qualifications
- Four online short courses for a PGDip
- Two online courses for a PGCert
- And four online short courses plus a workplace-based project for an IBMS accredited MSc (up to six years to complete)

When

12-week courses start in April and October.

Fee information

Information on fees is available at www.biomedonline.co.uk. There is a discounted fee for members of the IBMS and students who work at a trust which is part of the Biomed Consortium (see the website for the consortium members).

Key facts
Attendance:
Each course runs for 12 weeks online.

Entry requirements:
These courses are aimed at employees across the health sector. You may already have a qualification in a science such as biology, biochemistry, chemistry or pharmacy at a range of levels from HNC or BSc to PhD. The courses are at Level 7 (Master’s).

How to apply:
Telephone: 020 8331 9978
E-mail: biomed@gre.ac.uk
Website: www.biomedonline.co.uk

Student comments
"Being able to complete the study while doing my job has been major advantage of this programme. The course was well structured, with a highly professional tutor. I have learnt a lot from the course as it has prepared me for a new role that I have undertaken in my place of work. I highly recommend it.

Mohammad Algahtani
Medical Services, Ministry of Interior, Saudi Arabia

"I thoroughly enjoyed this course; the weekly online group learning keeps you focused, facilitates group learning and supports you through the content.

Philippa Burns
Public Health England

"I completed the Quality Systems Management course. The major advantage of this course is that there is a good mixture of theory and discussing with course colleagues, as well as practical laboratory related activities. It helped me hugely as well as the place where I work.

Miguel Everisto
Lewisham and Greenwich NHS Trust

"Having recently added Quality Manager duties to my Pathology role, the Biomed Online Quality Systems Management course was very useful to me to focus my mind on quality issues. The practical assignments were carried out on real data and documents within my lab, and therefore contributed to satisfying the regulatory requirements of the laboratory.

Helen MacDonald
The Royal Marsden NHS Foundation Trust
